Installation Notes:

- 1) Sign targets on this plan indicate approximate locations of ground mounted and building attached sign placements. Sign Contractor shall place signs in accordance with on-site staked or marked ground positions and dimensioned building wall positions indicated on Design Intent drawings, and in accordance with local sign ordinances and sign variance approvals for site set-back and clearance requirements.
- 2) Sign Contractor shall backfill, grade, and finish around ground mounted sign footing and foundation installations to match adjacent landscape materials or hardscape finishes. Sign Contractor shall notify Owner or General Contractor of any conflicts with, or damage to, underground utilities, irrigation systems, or landscape plantings while placing sign units, footings, and foundations.
- 3) Sign Contractor shall provide durable, temporary sign face covering for installed sign units with messages that conflict with traffic patterns as a result of current site construction activity until such time that the signs are ready to be put into service.
